

Herzogenrath (Germany), August 2015.

HEAD acoustics participates in the conference “eCall Days”

The "eCall Days Germany 2015" is the largest conference on the pan-European eCall in Germany. On 23 and 24 September 2015, the event will take place in Berlin at the Representation of Niedersachsen at the Federal Government. HEAD acoustics will contribute a presentation to this two-day conference.

"eCall Days" brings together all important stakeholders from the European Commission, politics and industry and provides a European-wide overview on the current status of the eCall deployment and implementation. HEAD acoustics is focused on speech quality of eCall systems for a long time and actively pushes the topic in the relevant standardization bodies. Consequently, the company will be represented at the conference with a presentation on "Auditory Tests for Certification of In-Vehicle Systems (IVS)".

Detailed information on the conference eCall Days can be found on the website of the event: www.its-nds.de/pages/de/ecall-days-germany/ecall-days-2015/home.php

About HEAD acoustics GmbH:

HEAD acoustics was founded in 1986 and has been involved in noise and vibration, electroacoustic and voice quality testing since its inception. The company is based in Herzogenrath, Germany, with affiliates in USA, Japan and France as well as a world-wide network of representatives. The Telecom Division of HEAD acoustics manufactures telecom test equipment and provides consulting services in the field of speech and audio quality. Moreover, HEAD acoustics closely co-operates with DECT Forum, ETSI, ITU-T, 3GPP, TIA CTIA, GSMA and other standardization bodies with regard to the development of quality standards for voice transmission and speech communication. In many partnership projects, HEAD acoustics has proven its competence and capabilities in conducting tests and optimizing communication products with respect to speech and audio quality under end-to-end as well as mouth-to-ear scenarios.
